case study

# Project Scope:

## eCatering head office fit-out

Starting with the blank canvas of a new-build office and warehouse, Office Options designed and developed a unique workspace for eCatering's new head office near Seaham, County Durham.

Working closely with the client, the interior design team produced CAD designs and 3D visualisations which were closely replicated on-site by our projects team.

The design incorporated full-height glass walls, feature flooring and a range of break-out and meeting areas, with striking black and white wood-framed furniture and seating upholstered in shades of grey. The very original neutral colour palette is enhanced with graduated vertical wall stripes and realistic plant displays.

Fit-out works included:

- Partitions & frameless glass walls to create private offices, meeting rooms and showroom
- Two fitted in-office kitchen & dining areas
- Warehouse canteen & kitchen
- Break-out areas and meeting points
- New air-conditioning & ventilation systems
- Power, data and feature lighting installations
- Custom-designed furniture, storage and seating

The result is an amazing and inspiring workspace for the market-leading and steadily expanding eCatering team!
